

Cover Letter – AI Engineer

Dear Hiring Manager,

I am writing to express my interest in the AI Engineer position. I recently graduated with a Bachelor's degree in Computer Science and Artificial Intelligence, with a strong focus on Machine Learning, Deep Learning, NLP, and Large Language Models (LLMs).

My technical background includes working with neural networks, Transformers, NLP pipelines, and modern LLM architectures. I have hands-on experience building AI solutions involving text processing, document understanding, summarization, and intelligent applications. I have also worked with models such as T5 and Qwen, including fine-tuning using LoRA and integrating LLMs into practical applications.

I enjoy understanding how AI systems work at a deeper level, from tokenization and embeddings to attention mechanisms, Transformer architectures, inference, and model fine-tuning. I am continuously developing my skills in LLM engineering and looking for an opportunity where I can apply my knowledge to real-world problems while learning from an experienced engineering team.

I am a motivated and fast-learning engineer who enjoys solving technical problems and turning AI concepts into practical solutions. I would be excited to contribute to your team and grow as an AI Engineer.

Thank you for considering my application. I would appreciate the opportunity to discuss how my skills and background could contribute to your organization.

Best regards,

Mohamed Ashraf
